Ansh Thakkar

Toronto, ON | P: +19054411615 | ansh.thakkar176@gmail.com

Career Objective:

As a Seneca College graduate, I have acquired numerous skills and techniques in the field of programming. I have pretty good knowledge on the working of operating systems (UI/LI) and commands for creating, working with as well as deleting the directories simply by writing a piece of code. I also recently learned about the functioning of the IBM software and writing the .sqlrple code which involves the use of green screen to run commands and display the file. But above all, my primary focus lies on gaming and web designing, thus, I strongly thrive in working in a certifiable industry and turn client/customer ideas into functional models.

Education:

Seneca Polytechnic College Newnham Campus, North York, ON

Diploma in Computer Programming (CPP)

September 2020 – May 2023

GPA: 2.6

Relevant Courses:

Unix/Linux and Internet

Advanced Database Services

Software Development Using C++

Web Programming Tools and Frameworks

Introduction to Java C++

Software Analysis and Design

Communication in Digital Workplace

Skills:

C

C++

JavaScript

HTML

CSS

React.js

Node.js

Java

SQL/Oracle

COBOL

Digital Marketing

Work experience:

Seneca College (Web Development)

I have made a working application on GitHub as a part of my required project during my course. I used JS, HTML and CSS combinedly. This basically involves working with a Postgres data source on the server and practicing refactorizing an application. Here is the link: https://github.com/AnshT176/web322-app

Circle K (Customer Service Representative)

I have also worked as a customer service representative at Circle K. This involves remarkable customer handling skills and making the customer buy more by various strategies of upselling and marketing. This also involves the use of Integrated Enterprise Solution, which is a software used to keep a track of inventory and total sales for a particular day. I am also aware of ordering as well as stocking some new products if it runs out of inventory.

Projects:
